DETAILED ACTION

1. Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.
2. Claims 1-3, 5-8, 11-14, 31, 32, and 35 are pending and have been examined.

Terminal Disclaimer

3. The terminal disclaimer filed on 3-17-2010 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of US 11/387,203 has been reviewed and is accepted. The terminal disclaimer has been recorded.

EXAMINER'S AMENDMENT

4. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Joseph Lutz on 4-20-2010.

IN THE CLAIMS:

Please amend claim 31 as shown below:

31. An integrated chip, comprising:

~~a first cryptographic block to decrypt received initialization cipher text using the chip secret key to form a chip ID, the at least one private key and a digital certificate;~~
key request logic to generate a key update request using a preprogrammed chip secret key stored within the integrated chip to receive at least one private key from a key distribution facility (KDF) if the key update request is authenticated by the KDF; and authentication logic to perform authentication with a content protection application to receive protected content using a received digital certificate to avoid disclosing the identity of the integrated chip during the authentication; and a first cryptographic block to decrypt received initialization cipher text using the chip secret key to form a chip ID, the at least one private key and a digital certificate.

Allowable Subject Matter

4. Claims 1-3, 5-8, 11-14, 31, 32, and 35 are allowed
5. The following is an examiner's statement of reasons for allowance:

As for independent claims 1 and 11: the closest prior art in the field does not teach the combination of features of the claimed invention, particularly including the steps of generating a chip secret key and programming it into a manufactured chip sent from the manufacturer to an original equipment manufacturer (OEM), where the chip secret key is programmed into the chip at the OEM manufacturer in response to an authenticated key update request issued from the chip in response to chip initialization.

Claims 2, 3, 5-8 and 12-14 are dependent on claims 1 and 11 respectively and are allowable for the same reasons given for those claims.

As for independent claim 31, the closest prior art in the field does not teach the combination of features of the claimed invention, particularly including the steps of generating a key update request using a chip secret key programmed into an integrated chip, where the request is authenticated at a Key Distribution Facility (KDF) prior to a private key being sent from the KDF in response to the request, where the integrated chip utilizes a digital certificate sent from the KDF in authentication, and where the integrated chip utilizes a cryptographic block to decrypt received initialization ciphertext.

Claims 32 and 35 are dependent on claim 31 and are allowable for the same reasons given for that claim.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
